It had the target separate away ad-
the service branch. The supply Co. was a sub-
ordinate of the district Co. Through this reason
of the chief of staff, to whom he was respa-
sible. His work was supervised by the supply
department of the General HQ and the special
officers of the Materials and Technical Department.
Occasionally the district Co. had a look into
the working of the branch. Through his sub-
departments he provided the district with all
the requisites and technical equipment. Every
sub-departments was headed by its respec-
tive Co.

The subdepartments were the following.

Ordnance sub department (Arms and ammo): it kept the files on the arms of the entire di-
trict supervised their condition and provided for their
maintenance. It had its specialised armorers who
repaired the arms which became damaged in the
course of usage. They had workshops at the dis-
trict and Barbaria-seats and they had a mobile
workshop with which they drove from
unit to unit and did the repairs right there. Keep-
ing the units provided with ammo. was also their
duty. They it was responsible for the ammo. dumps
and their like for the entire district. The Co. of
the subdepartment had to supervise the condition
and serviceability of the arms, shooting.

Technical subdepartment.

Its Co. was an officer usually 1st lieut. who had
some technical education. The officers and NCO-s
serving in this subdepartment all had some
technical education and background. The enlisted
troops and NCO-s of the department were attended
a short technical course (2-3 months.) The
duty of this department was the keeping up of
the technical blockade the mine-fields the
lookout-posts the maintenance and repair of
bridges and other object lying in the proximity of
the roads. It had to maintain the different
kinds of road-signs. The personnel of the technical
technical subdepartment of the districts amoun-
ted to 40-60 men on the average depending on
the size of the district. Besides their professional
